Letter of Conformity – EN 13823 / EN 13501-1 / EN 60332-1-2

No-Burn Plus has been tested at SP in Sweden pursuant to EN 13501-1, using test methodology EN 13823 – ‘Single Burning Item’ (SBI). The product achieved Euroclass **B s₁ d₀**.

We have been requested to confirm that this testing methodology can be related to the requirements of EN 60332-1-2. We have studied this standard as it relates to Reaction to Fire for Cables; in our opinion the testing methodologies are in fact virtually identical, indeed FIPEC (which forms the basis of EN 60332) was developed by SP in Sweden using the SBI test method as its basis.

We have also been asked to confirm how, in our opinion, our existing results under EN13823 / EN13501-1 would equate under the EN 60332-1-2 standard – our view is that No-Burn Plus would achieve **B1ca s₁ d₀**.

Regards
